Week 2026-W25

Generated 2026-06-15 · organic-only operator guide

How to use this

- **Weekly (~15 min):** one sitting to batch-schedule the week's posts in X's native composer.
- **Daily (~2 min):** reply to inbound mentions and, optionally, quote-post a public thread.
- **Organic only:** every post is scheduled by hand — there is no API and no automated posting.
- **Never auto-reply to strangers.** Reply only to people who engaged you first (a mention, reply, or quote).

X Native Scheduler — step by step

X Native Scheduler (desktop web only — the X mobile app can't schedule; @WCDraft has Premium, so full access).

Schedule a post: (1) On a computer, go to x.com, signed in as @WCDraft → click **Post**. (2) Paste the post text; add image/video if any. **If the post contains a wcdraft.com link, paste it and wait a few seconds for the OG preview card to populate in the composer before scheduling** — schedule too early and the link can post without its image. (3) Click the **calendar/schedule icon** at the bottom of the composer. (4) Set date + time (ET) — schedulable up to ~18 months out → **Confirm** → **Schedule**. The post enters the queue and auto-publishes.

Batch the week: repeat for each post in one sitting (native scheduling is one-at-a-time — no bulk/thread scheduling). ~15 minutes for the week.

Manage scheduled posts: open the composer → click the **calendar icon** → **Scheduled posts** tab → tap to edit time/content or delete.

Notes: scheduled posts are treated identically by the algorithm (no penalty). One post at a time, no native thread scheduling, desktop-web only.

This week's posts (W25)

42 ready-to-paste posts, grouped by day. Pick the strongest 3–5 per day — you don't post them all. Copy one block, paste into the composer, schedule.

Result spotlights

Post one only when you (or a player) have a genuinely strong real run. The record is computed from a real share token — never invented.

Reply bank

Reply only to people who engaged you first — one reply per person per day. Find the matching scenario, copy a variant, tweak a word, reply. Never reply to abuse.

Someone shared their run

They posted a share link or their XI/record. Be warm, specific, invite a rematch.

Variant 1

Love this squad. Want a real test? The link replays the exact run in any browser — same seed, same result. Drop your record and tag a mate to beat it.

150/280 chars

Variant 2

Strong XI. The run link is fully reproducible, so anyone can take the same spins and try to top you. That's the whole game — go again and chase the 8-0.

152/280 chars

Variant 3

Nice. Try it in Memory mode next — ratings hidden until you simulate, so you're drafting on what you actually remember. The reveal hits different.

146/280 chars

Question about the game

Be helpful and concrete. Always include the play link.

Variant 1

Happy to help — it's free and runs entirely in your browser, no download. Seventeen spins, one pick each, build an all-time XI, then run the real 2026 bracket. Start here: <https://www.wcdraft.com/play>

195/280 chars

Variant 2

Good question. You pick your era (All-time, Post-2000, Post-2010, Modern), draft 16 players + a manager, then simulate 8 matches. All in-browser, nothing to install: <https://www.wcdraft.com/play>

189/280 chars

Variant 3

Sure — Classic shows every rating, Memory hides them until the reveal. Same seeds, same outcomes either way. Have a go: <https://www.wcdraft.com/how-to-play>

143/280 chars

Someone praised the game

Gracious, brief, nudge them to share.

Variant 1

Appreciate that! If you had a run you liked, hit share and post the link – it replays exactly, so your mates can take the same spins.

133/280 chars

Variant 2

Thank you – that means a lot for a fan-made project. Tell a friend who'd argue about a 1970 fullback vs a 2026 prospect.

120/280 chars

How is this different from 82-0 / 38-0-style games?

NEVER disparage them. Lead with our distinct features, positively.

Variant 1

Same love of a good draft, a few twists: it's free in your browser, you draft across 1930–2026 with era presets, the manager is one of your picks, and your XI plays the real 2026 bracket in a calibrated sim.

207/280 chars

Variant 2

If you enjoy those, you'll probably like this: pick Squad First or Position First, draft a manager too, and try Memory mode where ratings stay hidden until the reveal. Free, in-browser.

185/280 chars

Variant 3

Different flavour of the same fun – nation Synergy rewards a connected XI, a season-keyed leaderboard ranks your run, and every run gets a reproducible share link. No download, no sign-up to play.

196/280 chars

Bug report

Thank them, ask for repro details, route to a channel. Never promise a fix date.

Variant 1

Thanks for flagging – sorry it glitched. A screenshot plus your browser/device helps us reproduce it. Reply here or DM and we'll dig in.

136/280 chars

Variant 2

Appreciate the report. If you can share the steps + your run's share link, we can replay the exact state and chase it down. More on the project:

Quote-post bank

Quote-posts only (quote a public post with your own comment) — never an unsolicited @-reply to a non-engager. Cap ~3/day. Lead with a differentiator; never disparage another game.

Quoting World Cup news / a fixture moment

React to the news, then pivot to drafting that team-year in wcdraft.

Variant 1

This is exactly the kind of moment wcdraft is built for – spin that nation's squad, pick your XI, and see how they'd run the whole 2026 bracket. Free, in your browser.

167/280 chars

Variant 2

Great window to build an all-time XI for this side – 1930 to 2026, manager included, in a calibrated sim of the real bracket. No download.

138/280 chars

Quoting a trending draft-game post

Positive, never disparaging. Lead with a differentiator.

Variant 1

If draft games are your thing: ours is free in-browser, you pick across 90+ years of World Cup squads, the manager is a real pick, and Memory mode hides ratings until the reveal.

178/280 chars

Variant 2

Add this one to the rotation – Squad First or Position First, nation Synergy, a season-keyed leaderboard, and a reproducible share link for every run.

150/280 chars

Quoting a football-nostalgia / best-XI thread

Meet the nostalgia, then offer the tool to settle it.

Variant 1

This is a pub argument with receipts waiting to happen. In wcdraft you draft the all-time XI yourself, then run it through the real 2026 bracket. Free, in your browser.

168/280 chars

Variant 2

Settle it properly: pick your era, draft 16 players + a manager, and let the sim decide. Same seed replays for anyone you challenge.

132/280 chars
